Micro-Sub Series -

Micro-Sub 2x6

DESCRIPTION

The **Micro-Sub 2x6** is a high definition subwoofer designed for permanent installation. It uses two 6" low frequency drivers in a very compact sealed enclosure.

Working in conjunction with external DSP processing, it achieves maximum bass output from a minimum enclosure size. DSP options include an Innovox proprietary powered system processor, or DSP configurations from our free library for Biamp, BSS and Symetrix processors..

The **Micro-Sub 2x6** complements the Innovox *Slim Line Series* of shallow profile surface-mount loudspeakers and the *Flex-Video Series* of displaymounted loudspeakers.

(shown without grille)

KEY FEATURES:

- ultra-compact enclosure
- Excellent transient response
- 45 Hz low frequency extension
- minimum depth (only 4.10 in.)

APPLICATIONS:

- theme venues and restaurants
- boardrooms
- video presentation / program audio
- retail spaces
